I build the *systems* behind the revenue, not just the pitch. At **Speed.ai**, I grew the customer base from **0 to 120** and **$1.9M ARR** while owning product, CS, and the lifecycle stack. At **Wrangle**, I scaled from **32 to 117 customers in 10 months** as the founding AE. Comfortable across sales, customer success, product ops, and the technical wiring that holds a GTM motion together.

Speed.ai · AI intake QA for personal injury firms

- Grew the customer base from **0 to 120 customers** and **$1.9M ARR**, owning sales, CS, and the full lifecycle funnel.
- Built the **Customer.io stack** from scratch — onboarding, trial-to-paid flows, segmentation, dormant-account re-engagement.
- Own the **AI prompt architecture** behind Speed.ai's intake scoring engine, iterating against real call data to cut false positives.
- Shipped the **first-week onboarding**: Loom walkthroughs, email cadences, in-app guidance — measured drop-off and rewrote the weakest steps.
